

Re: MB Docket No. 04-233

It has come to my attention that the FCC is contemplating giving priority to LPFM stations over current FM translator service stations like K-LOVE which I listen to on 94.3 in the Chicago area.

I not only support K-LOVE by listening, but I also support them with my money. There is already enough loud, obnoxious, and vulgar material on the air waves, and I am afraid that I would be served up with more of the same if stations like K-LOVE were displaced by LPFM carriers.

K-LOVE is truly operating in the best interest of the community by offering an alternative that respects the listening audience and offers them real help in troubling times via the programs they provide and their prayer request line.

Allowing stations like K-LOVE to be displaced would truly be a tragedy.
